Experience

ADXPERT, FrontEnd Developer – Remote   Jan 2025 – Feb 2025

- **Spearheaded** the project's **frontend development** and the **architecture** driving timely **feature delivery**.
- **Created reusable**, **interactive**, and **dynamic components** to **enhance user experience**.
- **Implemented** features like **dynamic rendering**, **lazy loading**, and **semantic event triggering**, contributing **1500+ lines of production-ready code** and improving load time by **20%**.

NOQS DIGITAL Pvt. Ltd., Web Developer – Remote   Jan 2024 – Feb 2024

- **Engineered** a **e-commerce platform** using **MERN**, achieving **100% cross-device compatibility**.
- **Crafted** a user-centric interface that **reduced bounce rates** by **15%** and **enhanced user accessibility**.
- **Integrated advanced features** including a **payment API** and real time **search functionality**, improving **user engagement** by **30%**.

Projects

CodePathshala

- **Developed** a **gamified, interactive coding platform** for **school students** with a custom **real-time code editor** supporting **Java, C++, Python, and JavaScript** for hands-on DSA problem-solving.
- **Designed** and enforced **scalable, level-based features** including **yatra points**, **yatra league leaderboard**, **achievement badges**, and a **multi-level DSA question system** to encourage daily practice and competition.
- **Integrated** a **level-based DSA system** with **Points**, **badges**, **timers**, and **graphs** to enhance user engagement.

Background-Removal App   *App Link*

- **Developed** a **SaaS platform** for **background removal**, integrating AI to remove backgrounds accurately.
- **Executed** features like **Razorpay payment gateway**, credit-based usage system, **secure authentication with Clerk**, and seamless **image downloads**.

Gemini App   *App Link*

- **Engineered** a **fully responsive Gemini chatbot clone** using React and Google Generative AI, achieving **sub-second latency** and supporting **50+ simultaneous user sessions** with zero downtime during testing.
- **Demonstrated** expertise in designing scalable, **conversational UI** with seamless **API integration**.

Netflix UI   *github/Netflix*

- **Built** a **Netflix clone** using **ReactJS, Redux, and Tailwind CSS** with **Firebase authentication and hosting**.
- **Demonstrated** skills in building **scalable, responsive, and user-authenticated web applications** with **real-time data handling** and **state management**.

Education

AISSMS IOIT, BE in Computer Engineering   Dec 2021 – June 2025

- CGPA: 8.2/10

Higher Secondary, Kendriya Vidyalaya, Lonavala   2020 – 2021

- Percentage: 91.8 %

Senior Secondary, Kendriya Vidyalaya, Lonavala   2018 – 2019

- Percentage: 85.4 %

Skills & Technologies

Languages: Java, JavaScript, SQL, HTML5, CSS

Libraries: ReactJS, NodeJS, Express, ReduxToolkit, Tailwind CSS

Others: MongoDB, Git, FireBase, Computer Networks, Object Oriented Programming
